EDUCATION

Bachelor of Technology in Computer and Science Engineering (2022-2026)
Shri Ramswaroop Memorial College of Engineering and Management Percentage: 80.27

Summer Bootcamp in Artificial Intelligence (April 2025-may 2025)
AICTE (All India Council for Technical Education) [Certificate]

PROJECTS

TruthLens: An Explainable AI Approach For Fake News Detection *[Github Link]*

- Built an **AI-powered fake news detection system** using **NLP** and **TF-IDF vectorization**, implementing Logistic Regression, SVM, and Passive Aggressive Classifier for multi-model text classification.
- Integrated **explainable AI techniques (LIME & SHAP)** to interpret model predictions, enhancing transparency and achieving high precision, recall, and F1-score across classification models.

Student Profile Analyzer *[Github Link]*

- Built an AI-powered cover letter generator using **RAG (Retrieval-Augmented Generation)** with LangChain, FAISS vector store, and Groq's LLaMA-3.3-70B LLM to generate personalized cover letters from student PDF resumes.
- Integrated **HuggingFace embeddings** for semantic search and deployed an interactive **Gradio** web interface enabling multi-student PDF upload, company-specific query, and real-time cover letter generation.

Predictive model for housing price *[Github Link]*

- Performed **Exploratory Data Analysis (EDA)** on a 545-record housing dataset using **Pandas, Matplotlib, and Seaborn** to uncover key pricing patterns across features like area, bedrooms, stories, and furnishing status.
- Generated actionable insights through **scatter plots, box plots, bar charts, histograms, and pie charts**, revealing that average furnished house prices (\$5.49L) are significantly higher than unfurnished (\$4.01L), with 31.6% of houses equipped with air conditioning.

EXPERIENCE

- Gen AI & Deep Learning-SRDT** *[Certificate]* (June 2025-July 2025)
Gained hands-on experience in Generative AI and RAG-based systems by working with **LangChain, FAISS, and LLMs** for building intelligent applications. Developed understanding of embedding-based semantic search, PDF processing, and deploying AI models using **Gradio**.
- Data Science-IBM** *[Certificate]* (Sept 2024)
Gained strong understanding of the data science pipeline including preprocessing, feature engineering, EDA, and model evaluation. Implemented ML models like Linear Regression and Decision Trees using **Scikit-learn** on real-world datasets.
- Python for Data Science-IBM** *[Certificate]* (Sep 2023)
Completed comprehensive training in Python for Data Science, covering data preprocessing, statistical analysis, and visualization techniques for structured datasets. Gained hands-on experience with **NumPy, Pandas, and Matplotlib**.

SKILLS

Languages : Python, SQL, C++

Libraries : NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, NLTK

AI/ML : NLP, TF-IDF, Logistic Regression, SVM, LIME, SHAP, LangChain, FAISS, LLaMA, RAG

Tools : Gradio, HuggingFace, Groq API, Jupyter Notebook, Google Colab, GitHub

Concepts : Machine Learning, Deep Learning, Generative AI, EDA, Feature Engineering, Model Evaluation
